## Projects

- **AfsarClock**

Created a digital clock web application with live time updates, offering both 12-hour and 24-hour formats. The clock is designed with a clean interface, emphasizing readability and aesthetic appeal.
- **Weather App**

Developed a weather forecast application using HTML, CSS, and JavaScript, allowing users to view real-time weather information for their location or any city. The app displays temperature, humidity, and weather conditions with a responsive and user-friendly design.
- **Grocery Store**

Built a user-centric grocery shopping app where customers can browse products, add items to the cart, and manage orders. Implemented an intuitive interface and features like product filtering, enhancing the user experience.
- **Songify (Music Streaming App)**

Designed a React-based music streaming platform for listening to songs. The app provides a smooth user interface for searching and playing music, with options to create playlists, manage favorite tracks, and enjoy seamless playback.
- **Image Gallery**

Developed an interactive image gallery application to display images in a visually

appealing layout. Integrated features like zoom, lightbox view, and navigation, creating a smooth and engaging user experience.
